SSC, Sri krishnaveni global talent school GPA : 9.3	06/2013 – 05/2014 Kothapet, india

Primary Skills

PROGRAMMING LANGUAGES: ● ● ● ● ●	SECONDARY SKILLS ● ● ● ● ●
HTML, CSS, JAVASCRIPT, BOOTSTRAP	PYTHON, SQLITE, NODE JS, REACT JS

Projects

STRATEGY WEBSITE, *Technologies Used: HTML, CSS, JAVASCRIPT, BOOTSTRAP* 📄 05/2025 – 05/2025

- Developed a responsive strategy website using HTML, CSS, and Bootstrap and js with custom styling and layout design.
- Implemented interactive components like carousel, accordion, and animated elements for enhanced user experience.
- Integrated Bootstrap's responsive navbar and utility classes for mobile-friendly navigation and UI consistency.
- Deployed the project using GitHub Pages to showcase frontend development and design proficiency.

MY PORTFOLIO, *Technologies Used: HTML, CSS, JS, BOOTSTRAP* 📄

- Developed a responsive personal portfolio using HTML, CSS, and JavaScript hosted on GitHub Pages.
- Showcased project work and contact details through a clean, user-friendly interface.

- Integrated modern UI elements with customized styling for improved visual appeal.
- Deployed and maintained the portfolio using Git and GitHub for version control and hosting.

RANDOM CHOICE PICKER,

Technologies Used: HTML, CSS, JAVASCRIPT, BOOTSTRAP [↗](#)

Using the above mentioned technologies, this project is designed to choose a random choices given by the user an input.

- User can give input as per requirement and let the picker choose an option out of them.
- Finally it highlights the picked option.
- Completely responsive and dynamic project.

WEATHER APP, *Technologies Used: HTML, CSS, REACTJS, REST API CALLS* [↗](#)

Created a weather application which is dynamic in nature and gives real time current weather data according to the input location data provided by the User.

- Displayed weather data such as pressure, humidity, max temp, min temp, wind speed etc of the input location.
- Implemented functionality such as change of background image according to the temperature of the said location.
- Implemented degree conversion from celsius to fahrenheit and vise versa using onclick functionality.
- Handled improper input data results by redirecting to not found page.
